Career Objective

Future graduate with industry experience in managing business requirements, analyzing markets, developing data visualizations, and engaging with stakeholders. Worked on multiple cross-functional projects effectively communicating market research and business requirements. Skilled in business analysis in the tech industry.

Education

University of Colorado, Boulder, CO

January 2021 - May 2024

Bachelor of Science in Information Science

Cumulative GPA: 3.7 Minor: Creative Technology and Design

Dean's List Spring 2022, Fall 2022

Experience

Student Assistant IT Business Analyst

October 2023 - Present

University of Colorado at Boulder, Office of Information Technology - Boulder, CO

- Utilized Jira to effectively manage and log business requirements for critical projects.
- Developed process flows using Mural to visualize and document the student housing application process procedures

Business Analyst Intern

May 2023 - August 2023

Spectrum - Greenwood Village, CO

- Conducted comprehensive market research to identify emerging customer needs and industry trends, resulting in strategic product improvements that strengthened the company's competitive position in the telecommunications market.
- Utilized Jira to effectively manage and log business requirements for critical projects, including data policy changes for international roaming usage. Developed clear and concise User Stories and Acceptance Criteria, ensuring seamless communication between cross-functional teams and successful project delivery.
- Led the creation and implementation of customer journey maps using LucidChart, meticulously plotting the ideal user experience and anticipating edge cases for international roaming data policy changes.
- Designed and crafted an insightful mockup dashboard in Excel, visualizing key performance indicators. The dashboard facilitated data-driven decision-making and provided stakeholders with actionable insights for better business outcomes.
